

Summary:

NOVOMAX SMS Parking can be explained throughout two main concepts. Combining those two concepts there can be more solutions depending on local laws or other conditions. Depending on specifications NOVOMAX SMS Parking can be implemented using a regular cell phone number but it is usual to be implemented using one or more shortcode numbers.

Pay through GSM service provider

In this concept user needs just one SMS message for entire parking action. One SMS message is used for one hour of parking time or one SMS message can be used for more parking hours. In some cases this concept can be used for daily parking tickets. In this concept user will send SMS message containing just vehicle registration number but depending on system configuration this message can contain parking area zone code also. After sending SMS message user will get response message where the user will be informed that NOVOMAX SMS Parking action is successfully started. In this concept user will get warning SMS message 5 or 10 minutes before NOVOMAX SMS Parking action expires.

Benefits:

- User can use NOVOMAX SMS Parking without registration, payment can be done by GSM provider via reverse billing system
- Only one SMS message is used for one parking action

Pay through bank account

In this concept user needs two SMS messages for one parking action. First SMS message is used for starting parking action and second SMS message is used for stopping parking action. First SMS message is containing vehicle registration number and second SMS message usually contains just one letter (Q – Quit). After sending first SMS message user will get response message where the user will be informed that NOVOMAX SMS Parking action is successfully started. After sending second SMS message (quit message) user will get response SMS message containing information that NOVOMAX SMS Parking service is ended. Before using service user must go through WEB registration process. In this process user must enter credit card number or bank account number which will be used for collecting parking fee at the end of the month. Also before using service user must define mobile phone numbers which will be used for NOVOMAX SMS Parking, those numbers will be referred to registered username.

Benefits:

- User can pay parking fee per minute
- No worry about parking time expiration
